### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### **Claim Rejections – 35 USC § 102**

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 21-27 and 32-37 are rejected under 35 U.S.C. § 102(b) as being anticipated by U.S. patent 5,145,219 to Babuder. The Babuder patent discloses the claimed device with first and second tubular members 12,14 each having a sealing end face with a raised annular bead 30,44, an inner bore 22,40 wherein the sealing faces of the two members face each other (see fig. 4). A sealing gasket 60 is captured between the sealing beads for sealing the coupling tubular members. The gasket contacts surfaces 24 and 42 which are co-planer and radially outward of the sealing bead and as

disclosed in column 6, lines 20-30 the surfaces 24 and 42 may include frictional surfaces in the form of knurling or roughening to prevent relative rotation of between the tubular members and the sealing gasket. Babuder further illustrates in figs. 9-11 the coupling with frictional surfaces 150 (teeth or knurls, col. 8, lines 18-19) radially outward of the sealing bead to prevent relative rotation of between the tubular members.

### **Allowable Subject Matter**

Claims 28-31 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 38 and 39 are allowable over the prior art of record.

### **Conclusion**

Applicant's arguments with respect to claims 21-27 and 32-37 have been considered but are moot in view of the new grounds of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
